Bingham House

Philadelphia, Jan 4 1898

Dear Deare:

I was fearful that the book would upset you, but your nerves are strong. Glad that the cover and the pictures please you.

Have Mr Brainerd send on the plants. Will try to get to them sometime during the month.

I have had a hard attack of grip — swallowed a wooden Nutmeg in Connecticut — but am now on the tramp again.

Yours for good,

L. H. Bailey

PURNELL'S,
SNOW HILL, MD.

Snow Hill, Md., Jan. 13 1898

My Dear Deane:

Snow Hill, Maryland, is a typical mid-southern town of some 2000 souls — about half of which are immaculate souls — in the southern part of the curious country which lies between Chesapeake Bay and the ocean. It is beyond the region of green-sward, and in the county of whitewashed houses, buzzards, winter-green hollies, ox-carts and ubiquitous niggers. The low-lying sandy plains is traversed

by broad and winding rivers, offshoots of the octopus-armed Chesapeake. Although Snow Hill is nearer the ocean than the Bay, it nevertheless has steamboat communication with Baltimore by way of the lazy Pocomoke river, and on the lazy and picturesque river boats with their sable freights of darkies. The sun shines brightly. There is no frost, and the people are sitting in their open doors enjoying the brisk-warm breezes which are brought up from the Bay. It is all quite as unlike your loved New England as Germany is. Thine ever,

L. H. Bailey

The Horticulturists' Lazy-Club.

CORNELL UNIVERSITY,

Ithaca, N. Y., Jan 16 *189*8

Dear Deane:

Alright; send on the plants.

Really, I don't believe I can find the time to come on & help in the greenhouse matter, altho' I'd like to do so. Get Ben Watson. He is handy by, & can give you better advice than I can. If you want book help, consult Taft's "Greenhouse Construction" (Orange Judd Co.) My "Forcing-book" (which you have) may give some suggestions.

All over my grippe. Twas the result of swallowing a wooden nutmeg in Conn.

Thine ever,

F. H. Bailey

Radley's Hotel,

Southampton

April 1878

My dear Deane:

Here is a breath from merry old England! All day I have been riding and tramping in the country, where the fruit trees are growing into bloom (they don't burst into blooms here), where the furze decorates the roadsides, & the agricultural activities enliven all the fields. The cowslips are peeping from the banks with their buttery-

yellow faces, the grassy fields sparkle with constellations of Bellis perennis, and the skylark mounts to the zenith in a rhapsody of song! Of all lands, England is the fairest!

Our passage was a rough one, and we were nearly a day late; but I am now able to walk straight, and my cupis full.

Thine

S. H. Bailey

I am pained at the growing dangers of war.

München, Apr. 15. 1903

An excursion in Normandy, a visit to Paris, a day in Strasburg, the beautiful fields of Baden, — and I am once more with my family! The girls are perfectly at home with the language & are always taken for natives; & they want to live here. But there is no use staying any longer for them, do I suspect that mid-autumn will see us in Amerika again, altho' I have a year's leave. Yes, I'll support your journal. In my pocket is Prantl's "Exkursions-flora für Bayern," and the fields & the Alps must yield me their treasures. Dr. Goebel invites me to go with him; Thurs. & F. & S. Yours of 3rd is here.

horizontal promontory, with the sides walled in to keep the place from falling down town; and one sees pack-horses and pack-women carrying supplies up the winding trails. Altho' pomegranates are in bloom, figs half ripe, and cherries ripe in riotous profusion, I raise my eyes and see ranges of snow and ice; and in Munich, on the north side of the Alps, cherries are now in bloom. One can scarcely believe that mere exposure counts for so much.

I hope that you are both well.

Thine, so long as the beer & cheese lasts,
S. H. Bailey

Hôtel Stiegl, Bozen Tyrol

May 19 1898

My Dear Deare:

If you will follow me into the Alps from Munich by way of Innsbruck, then cross the Brenner pass — famous since the days of the Romans, — you will find me wandering in the warm and deep valleys on the southern slopes of the Tyrolese Alps, with bases at Bozen and Meran. These

valleys supply much of Europe with fruit, and this fact, no doubt, explains why I am here; altho', if the truth were known, I got tired of sitting down so jumped on the cars.

I have never seen a more interesting country, either in natural features or in people. The folks are a curious compound of South German and Italian, altho' politically they are Austrians. The language is German, but it is very dialectic and difficult to comprehend. And there are other lingoes of which I cannot venture the names. Nobody speaks English, but everyone, I guess, hates America in the present crisis. Not only the country itself, but the ideas of life are so different from ours that I often wonder whether I am in a dream or transported to some other planet; but the hotel bill always dispels such illusions.

The land is intensely cultivated with grapes and tree fruits, and the available places have been taken up for so many years or centuries that the people have long since fallen into stereotyped and rigid ways. Far up the mountain sides one sees little plantations wrought out of a level or

Munich, May 13

Dear Deane; Yours of Apr. 19 here a few days ago. Glad you rec'd the booklet. Will write my name in it when I visit you again. I have been unwell for a month & more & next week we are going to the Alps Dome- where. We shall make Munich our base for about a month yet, but at that time shall pull up stakes & try some other land. Don't write here later than June 1. Here- after, mail sent in care of American Express Co., 6 Rue Halévy, Paris, will reach me Dome- where. Mrs. B. & kiddets are well. Ladies are taken for natives. Sara is completely Germanized. Regards to Mrs. D. Sentiment against America here. Mine ever, L. H. Bailey

WALDHAUS JACOB

HÔTEL & PENSION RESTAURATION

AM BODENSEE BEI KONSTANZ,

den June 21 1898

My Dear Deare:

Yours of May 22 reached me June 5, and it should have been answered before; but travelling in strange lands with a wife and zwei Kinder consumes one's time, particularly if he endeavors at the same time to see everything in sight and in the guide-books. We have left dear old rainy Munich, and it almost broke our hearts to do so. My wife says she would like to live in Germany if I could make a living here! And my Sara is ready to cry every time we speak of leaving Germany. So we are now lingering on the edge of Switzerland, dreading to cross & to sever the ties which have grown so strong. And yet it was only a few months ago that Mrs. B. was the most homesick woman in Germany! My Children speak German like natives (I envy the little scamps), Sara particularly, who is completely Germanized. She retains her English, but has a neat little brogue. She is now trying to write English, but has forgotten so many of the letters that she makes small headway. She is so full of mischief and of German that she

seems quite strange to me.

The Bodensee (or Lake of Constance) interests me greatly. It is the largest lake in Europe probably, and most important commercially. It is bounded by three countries, — Switzerland, Austria, Germany, and the German part belongs to Bavaria, Württemberg & Baden. Consequently, things are mixed as to money, postage, customs duties, and the like. It seemed odd enough when I walked just outside the gates of Constance, and saw a Baden officer on one side of a ditch and a Swiss on the other, examining milk-cans, yards of merchandise, and the like. This morning we all took a walk thro' lanes & woods, and finally came upon an elevated opening with a Waldhaus ("forest house") fronting a superb view. Below us lay the lake like a piece dropped out of the blue heaven, and beyond rose peak after peak of the snowy alps. The kiddies were wild with delight, & Mrs. B. was pleased. So I made a bargain with the landlord to meet at once to Konstanz for my duds, leaving the family gazing into the depths of the landscape. I had expected to go to Switzerland in a day or so; but instead we are in the Waldhaus Jacob, still staring at the alps (which we have seen so often), & with no idea of when we shall leave! In

the meantime, I shall wander den 189 saunter in the romantic country, interviewing the corner bier-gartens, frightening the peasants with my German, and swearing betimes at the picturesque hotel bills.

We spent a few happy days at Lindau, which is on an island at the other end of the lake. The jingle runs—

Lindau liegt im Bodensee,
Wer's nicht glaubt, geh' hin und seh'.

The Bodensee was the Lacus Brigantinus of the Romans, and — well you know the rest of that. But I have had the satisfaction to-day of actually seeing apples which were taken from those lake dwellings which long antedate any Roman occupation! We have also been at Bregenz (the modern Brigantinus) at the other end of the lake, and have climbed 1000 feet to get a view of the vast delta which the Rhine has shoved into the lake, and of the magnificent panorama of mountain and lake.

In all these wanderings the plants interest me immensely, and I have

smuggled a bundle of carices into the bottom of my wife's trunk. Wife & I took a trip off into the Austrian & East-German alps, and there I was much attracted by the vegetation. I wanted to bring all the plants home with me, but as my wife insisted ~~on~~ on putting various dresses and other useless articles in the luggage, I was obliged to leave the forest trees behind. I shall have my revenge some day!

But I am tiring you out. The mountains have flung back the last caresses of the sun and are wrapping themselves in cloud, which reminds me that I must crawl under my feather-tick, hang my feet over the foot-board and give you & Mrs. Deane ~~the~~ a rest.

Yours for good,

S. H. Daily

Schaffhausen, Switzerland, June 27.

Your good letter of 12th came just as we were leaving Constance & I read it on board the Rhine-boat. Sara was much pleased with your greeting & made up the face for our benefit. Her ready use of German is a great help to us. Ethel is sick in bed, & we are laid off here. Nothing serious, I guess. F. H. B.

Miss Martha Bebb,
Kalamazoo, Mich.

Dear Madam :

I am requested by our mutual friend, Walter Deane, to write you respecting your brother. At Mr. Deane's request, I wrote your brother about the facilities which are offered here for horticultural work. Mr. Deane wants to know if I would advise him to come here and to change his business. Upon that point I do not care to give advice. I believe, in general, that a young man should follow the thing which he likes best ; but, on the other hand, one should be careful about giving up an assured position for an uncertainty. I do not know whether your brother desires to go into teaching or to make a business of gardening or fruit-growing alone. My own belief is that a man with good education and good business ability can make a very good and pleasant living in the growing of fruit. He may not have so much money in the bank as some other people, but to one who loves outdoor life, there is more solid comfort in it. In experiment station and teaching work, there is always an opening for first rate men who are well prepared. I really could not give you any definite advice without knowing more about your brother and what his desires are. If he should come here, I should try to give him what personal attention I could. I should be glad to do this not only for his own sake, but for the memory of your father whom I had the honor to class amongst my personal friends.

Yours most truly,

L. H. Bailey

Dear Deane:

Proud I am that any of my humble efforts should please you. It was fun to write the grape history.

No, I did not give the history of the Niagara because it did not occur to me as necessary. It is a recent comer and horticulturists know its history. But I should have done it. See "Survival" p. 436. It is a seedling of Concord, perhaps crossed by a hybrid of the fox grape.

From botanical evidence, we place Isabella with Vitis Labrusca, altho' the date, place & method of its origin are unknown.

The experiments now being tried to grow Vitis vinifera, with spraying. The hardy vars. will no doubt succeed. The phylloxera or root-louse must be reckoned with. Fowler.

ITHACA, N. Y., May 29 1899

Dear D: I want you to have your name in the Cyclopedia. Are there not some genera which you'd like to work up?

I want you to help me out on Caesalpinia. I send you a first rough draft, showing what species are in cult. You have access to the literature & can supplement & extend the descriptions and throw the species into systematic order, with a key. Perhaps they can be divided into erect plants & climbing plants, or with stamens long-exserted & not exserted. Let me

have it in a few days. I will put your name on as joint- author.

Thine

Dunkirk, N.Y. Dec 189

My Dear Deane:

Was most glad to get your letter. Your typhus has fug. We are all well.

Yes, I am doing several little stints, and don't if I can ever find time ever more. Expect to get as far as Boston. The Cyclopedia is a tremendous job. Vol. 1, A-D, (pp. ~~605~~ 609) to all in type, and in ~~last~~ Have a month I hope to see it on sale. It is my chief worry. We are now finishing writing on the letter F ~~now~~ Have

years' work; but I hope
to see the printing done in
1900. I have a number
of other books on the side —
just for fun.

Did I tell you that
we are building ourselves
a nest? Yes we be. Mr
Millionaire Sage — who
gave so much to Cornell —
left his house to the
University (or rather his sons
gave it) but his fine
brick stables + coach house
— as were put up for sale.
I bought 'em and a
lot 240 ft. deep on the
main street. Now the
roof is just completed on
my new house — a
tile roof resting on
solid brick walls; and
connecting the house
with the [illegible] is
to be the coziest den of

CYCLOPEDIA OF

AMERICAN HORTICULTURE

DEAR SIR:

Enclosed is a proof of matter which is going into the Cyclopedia. We should like to have any corrections which may occur to you. Please return it RIGHT AWAY. Stamped envelope enclosed. We should like to send proofs to you frequently as the work proceeds, and to put your name in the preface as having helped us. If you are too busy to be bothered you may draw a pencil mark across this slip and return it to us, and we will not send you any more.

L. H. BAILEY

Ithaca, New York

The things you can help us on in this proof are these:

1. Any suggestions or corrections as to cultural directions.
2. Name any species which have been omitted. We want to insert all the species which are IN THE TRADE in North America, but not those which are known only in botanic gardens and the collections of fanciers.
3. Any general suggestions as to the treatment of the subjects,—particularly SHORT-COMINGS.

HEATED THROUGHOUT WITH STEAM.

CYCLOPEDIA OF AMERICAN HORTICULTURE
L.H. BAILEY

TO BE PUBLISHED IN
FOUR ILLUSTRATED VOLUMES

L. H. BAILEY, EDITOR
WILHELM MILLER, ASSISTANT

ITHACA, NEW YORK, Nov. 6 1900

My Dear Deane:

I sent the sprigs to Hosford, asking him to write you the names as he knows them.

You were not more surprised and chagrined over Mr Miller's article than I. It was wholly unknown to me until I saw it in print. I at once took him to task about it, and such a thing will not occur again. In fact, it is troubling him much, for he had seen the danger and folly of it before it came to my notice. With much care I edit everything he writes, but this got away

CYCLOPEDIA OF AMERICAN HORTICULTURE
L. H. BAILEY

TO BE PUBLISHED IN
FOUR ILLUSTRATED VOLUMES

L. H. BAILEY, EDITOR
WILHELM MILLER, ASSISTANT

ITHACA, NEW YORK, _____ 1900

Mseen. Mr Miller is a most valuable man to me. He is laboriously accurate and is most skilful in running down nomenclatorial and bibliographical puzzles. But his emotional enthusiasm gets the better of him very often. This does no harm for I take it out of all his writing. The Cyclopedia has cost me too much to have mere sport made of it; but Miller wrote the article in good faith & good spirit. He suggested to the editor, after the article was sent, that it be destroyed; but the editor printed it, and thus more persons than its author have cause to

feel ashamed.

Won't you and Mrs. D. Come to see us this winter? We have beans and can get brown bread; and we will all have a good time. Mrs. B. often speaks of it. We have now but two a new home, and it don't look.

Thine

F. H. Bailey

CYCLOPEDIA OF AMERICAN HORTICULTURE
L. H. BAILEY

TO BE PUBLISHED IN
FOUR ILLUSTRATED VOLUMES

L. H. BAILEY, EDITOR
WILHELM MILLER, ASSISTANT

ITHACA, NEW YORK, 11/7 1900

Mr. Walter Deane,

Dear Sir,

Prof. Bailey showed me your letter and I think your strictures none too severe. I came to the same conclusions of my own accord some time ago. I saw the mistake as soon as Mr. Williams sent me proof and I suggested that he should not print the article. Unfortunately I did not suggest hard enough. I would pay a good deal to suppress the article. It was an expression of a mood and not, I trust, of the man; but the world does not understand that and judges a man by his lapses rather than by his steady work. I do not believe in antagonizing good people unnecessarily. It has taught me a severe lesson and I am not likely to repeat the mistake. Prof. Bailey is the best tempered man in the world; he never scolds, nags or gets cross. He understands that I am more miserable from self-reproach than in any words he could say. Yours

Wilhelm Miller

Gray Herbarium of Harvard University,

Botanic Garden, Cambridge, Mass.,

Mar. 9, 1900

My dear Dean -

Thank you for sending me Bailey's & Miller's letters. I am glad to know that Miller realizes the significance of his article. I did not suppose he did for it was published not only in the Asa Gray Bulletin but in American Gardening as well. I am sorry that such a thing should ever have been written, and when I read it it was with no thought of injuring Bailey in the least. As a piece of current literature of the wrong sort it was taken to the meeting on the recommendation

Gray Herbarium of Harvard University,

Botanic Garden, Cambridge, Mass.,

19

of more than one member who had seen it, and when I read it I think I expressed true disgust at the unfortunate but certainly naïve tone of it.

I really doubt, as does Dr. Robinson, if anyone but you (a personal friend of Bailey's) will give the matter further or serious consideration. I am glad, however, to see the Letters which I am now returning, and as opportunity offers I shall be glad to make a quiet apology for Miller's ill-advised action.

Sincerely Yours,

Benj. L. Rusby.

L. H. BAILEY Chief.

EDITOR'S OFFICE, ITHACA, N. Y., June 28 1902

Dear Deane:

Absence in Wisconsin and other foreign countries has delayed my reply to yours of the 17th. We are already aware of the omission of the cross-reference "Beech" in Miller's Dictionary of Trees, and are making the change in the second edition, which is now going on the press. I do not know that there is any difference between Purple Beech & Copper Beech except in the spelling of the names.

When shall we look for you and Mrs. D. at Bailwick? We move down next week.

Yours
L. H. Bailey

Bailiwick
ON CAYUGA LAKE,
(P. O. ITHACA, N. Y.)

July 10, 1902

Dear Deane:

Glad to hear, and to know that there is a probability of your coming to my dug-out- this summer. Come!

I don't know the Phacelia-like plant you send. I don't believe that it is cultivated.

The corrections to Miller's Cyclo. will be made in the plates — only a few of them.

Thine, L. H. Bailey

Station with a Stone boat.

Wet as the bottom of the lake all over this country.

Yours

H. Bailey

Bailiwick
ON CAYUGA LAKE,
(P. O. ITHACA, N. Y.)

Aug. 13, 1902.

Dear Deane:

Guess I did have the world's work over you, but I had forgotten it; but it is all O.K. Glad you enjoy it. It is worth while to make country life when such good judges as you and Mr Brewster like it. There is some work about it. Wish you

could see your office, — then you could under- stand. I am now making a second edition of the Cyclo.

When are you coming out to Bailiwick to see the dug out where I live? Of course you will not to come without the better half. Come! We will buy an extra ham if you will notify us long enough in advance, and

Bailiwick

Christmas eve, 1902

Dear Deane:

It was my mistake in writing you about a book another man sent — I thought I always do new work. Your writing; — until — is clear as ever, for I have the photograph, and that's better. It is a capital picture. Many thanks.

All goes well here. Merry Christmas & Happy New Year.

Yours ever
L. H. Bailey

I hope that all goes well with you. Come to see us, — both of you.

Yours ever

L. H. Bailey

Country Life in America

EDITED BY L. H. BAILEY

Editor's Office, Ithaca, New York

Dec. 27 1902

My Dear Dean:

You rascal! The book is much to great a present for you to have made me. It is a beautiful thing and I shall prize it highly. Many thanx.

The only way to tell whether Country life will keep up its standard is to watch. The proof of the pudding is what the pudding is. The editor of that magazine, however,

has no fear on that score; but, then, editors are unreliable folk.

Much obliged for your invitation to come East; but you did not say a word about raising any money to make it possible for me to do so.

You will continue to receive Country Life. The Greenhouse, on p. 125 of the Jan. issue is my (personal) affair. Another picture of my place appears on p. 17 of the Nov. issue (Staircase).

Country Life in America

EDITED BY L. H. BAILEY

Editor's Office, Ithaca, New York

Mch. 23 1903

My Dear Deane:

Rec'd your letter. Yes, I have not a new job. It is a sacrifice to me personally and I did not want it; but sometimes a person must stand to the guns even tho' he does not care to. I shall be no longer proprietor of Forestry after June 1,

Just direction of "things in
general". My days of
teaching are done.
I shall give up all
my private work
that seems to interfere
with the new job, —
how much a little
that will be I can't
yet tell. I have
had to country life
for a time at least.
This is the for-
mardest my most im-
portant March I
can know.

Country Life in America

EDITED BY L. H. BAILEY

Editor's Office, Ithaca, New York

May 3, 1913

Dear Deane:

Returning from a long absence in the South, I find two letters from you. I am exceedingly sorry for your illness, the more so as I seem to have been the indirect cause of it. But, by this time, you should have known that it is exceedingly dangerous to read

one of my books. I sent it to you only that you might fill some odd corner of your book-case, not that you should be so rash as to read it. But your second note says that you are improving; thereby, take warning and never commit such an indiscretion again.

By this time I hope you have completely recovered. Let me know.

Yours, with deepest sympathies F. N. Bailey

COLLEGE OF AGRICULTURE
OF
CORNELL UNIVERSITY
L. H. BAILEY, Director.

DIRECTOR'S OFFICE.

ITHACA, N. Y., Nov. 2, 1903.

My Dear Deane:

I am glad to hear from you again. Twice this season I have spoken in Boston but have not had time to run out to Cambridge. I am away much on University business. I come home now and then long enough to say good bye. I never was busy before. My time is taken up with so executive work. My days of teaching are done, and I fear my scientific life is also all passed. I am still able to afford three humble meals a day.

No one is editor of Country Life. Miller takes the brunt of it. Several of the foax in the New York Wire take a hand.

I am glad that Mrs. Deane remembers me. It has been a long time since we have met. You ought both to repent and come out to Ithaca and get a breath of real western air. I will keep the Indians off. It will do you good and make us happy.

Thine as of old,

C. H. Bailey

Christmas, 1903

Dear Deane:

Jack London is fine. Ever so much obliged. Two or three days ago I sent you a little token.

For sometime I have been used up, and am leaving tonight for Bermuda. I shall be back in two weeks or less. I have given up my Boston lectures for this time. I am not bad off — only a sort of lazier than usual.

Yours truly

F. H. Bailey

CORNELL UNIVERSITY
COLLEGE OF AGRICULTURE
ITHACA, N. Y.
L. H. BAILEY, DIRECTOR
DIRECTOR'S OFFICE

Sage Place,
Ithaca N. Y.
Jan. 1st 1904.

Dear Mr. Deam:

I wish both you and Mrs. Deam a "Happy New Year", and thank you for the interest in the Baileys.

I have only had a cable, from Mr. B. so I do not know, if the trip is doing what we hope it will do for him. He was in about the same condition, after his collapse, as he usually is, no worse, I do not think. He has escaped them for sometime, and I was hoping, that as the years advanced he would be free entirely from them, but a man cannot disregard all laws of nature and not suffer from it. Of course this new burden is a tremendous thing, as he has started out with it. I often think of the days in Cambridge, when we had nothing, neither money, nor reputation. We

haven't much now, but a little of it is a "dangerous thing". I would gladly change back if I could have quiet and my husband. I wonder if you and Mrs. Dean will ever come to see us? I wish you would. We entertained Dr. and Mrs. Fotheringham two weeks ago. They live on Beacon St. Boston. He was the Sage Chapel speaker for the Sunday of Dec. 20th.

I will tell Mr. B. your thoughtfulness in writing, and have him write as soon as he returns, which will be Monday night, or Tues. A.M. We are talking of going to Germany in March. Mr. B. wants the girls to get their German back before they enter Coll. If he is well enough, I shall take them in March, and he will follow in June. If he is not well enough, for me to leave he will go too. I do wish you and Mrs. Dean could come out here, and renew our acquaintance. You were discouraged the first time, so you do not want to come again. Thanking you for your interest,

I am, Sincerely,

Annette Bailey

Cornell University
College of Agriculture
Ithaca, N.Y.
L.H. BAILEY, DIRECTOR

Ithaca, March 27, 1904

My Dear Deane:

Surely I am the most shameless of correspondents. For a month and more a letter of yours has remained unanswered; and I have even failed to acknowledge the interesting article in the New England Magazine. The article I have read, and it is good. I take the N.E. Magazine and have for some time. I like it.

As for myself, I am a wanderer. Once I was a professor and enjoyed a fair degree of self-respect. Now I am a third-rate business man and a tenth-rate politician. Much of the time I am in Albany. The other day I was in Georgia. Just recently I was in Bermuda. My family is in Europe. Now and then I am here. The days of my quiet horticultural and botanical work are done forever, I fear. But despite all the

mutations of time (I think that is the proper phrase) I manage in various ways to average at least two meals a day, with now and then a bite between.

As to the bulb matter, possibly you will get a little light by reading my Bermuda article in April Country Life, although I don't often find persons getting light from my writings. After forcing, bulbs of hyacinths and tulips are thrown away, merely because they are so much spent that they are unprofitable for further blooming. That has nothing to do with the method of propagation. The same bulbs in the open ground, might remain for several years.

I am supremely well, — so well that I can't remember just now when I was really sick. You must let me hear from you now and then (mostly now), for I do like to keep in touch with the great outside world. Thine, for old times,

L. H. Bailey

L. H. BAILEY,
A. R. MANN, SECRETARY,
ITHACA, N.Y.

Sept. 12 1905

Dear Deane:

I was very glad to have your letter of the 4th. You are really having a variegated summer, and I know that you are both enjoying it. Seems to me it is about time for you both to pay us a visit. If you would come next summer, we would tramp the hills, row, ride horseback or by wagon and have more fun than two young kids.

You ask about our trip. It was only a little scoot to the Pacific Coast. None of the three girls had ever been there, so we went. Last year we were in the high Alps. They had never seen our own high Mountains and I told them that some of our mountains would knock the tops off these European hills. Of course they did not believe me. [illegible]

satisfied. We saw the best of the Cascade mountains, stopped in the vast woods at the base of Shasta, rode bronchos in the primeval untrailed wilderness, and otherwise cut up high jinks. We spent a little time at the Portland Exposition (it's a beauty) and came back by the Canadian Pacific. The youngest girl is now in high school, the second enters Cornell this month, and the oldest one is still keeping house for me.

We are now at Bailiwick, where we send dearly love to Ira; but tomorrow we go back to town to begin to saw the winter's wood. This has been a charming rainy boating day:

Away with care; I will walk today
Through meadows wet and forests gray.

Yours, on a cold basis,

A. W. Bailey

Christmas, 1905

Dear Deane:

You could not have sent me anything more acceptable that Maeterlinck's "Old Fashioned Flowers". I am very fond of Maeterlinck, and I borrowed a copy of "Old Fashioned Flowers" to read, and ~~then~~ yours came; so, you see, I-

was just- to the occasion.
Ever so much obliged.

I have come down
here with the three
girls for Wagner and
a rest.

Hope you are all
well. With compliments
of the season, as of Yore,
Thine devotedly
F. H. Bailey

L. H. BAILEY,
A. R. MANN, SECRETARY,
ITHACA, N.Y.

Dec. 31, 1905

Dear Deane:

Yes, the pictures are just about Ithaca, largely immediately associated with the University. The calendar was gotten up by some women in the town. They should have put legends on the pictures.

The three girls and myself have just returned from New York, where we have been taking in grand opera, whilst other persons took in our cash; if the other persons enjoyed the operations as much as we did, they are welcome to what they got.

I wish you and your best girl would come to see us.

Thine ever,

L. H. Bailey

Bibliographer—Dir. A. C. True, Ph. D., Washington, D. C. Secretary and Treasurer—Dir. J. L. Hills, D. Sc., Vermont

OFFICE OF PRESIDENT

Ithaca, N. Y., Dec. 28 1906

Dear Deane:

Time goes on and on; but I am in good health, all three of my girls are well and happy, I get enough to eat and the house does not leak, so I am happy. My older daughter is a student in Smith and the younger one will go next year. That will leave the original girl and myself alone again.

As for myself I am building a college and also another Cyclopedia. Incidentally I scoot. The more I stay at home in my mind the more I seem to travel in the cars. I don't believe in vacations, but I am powerful fond

of Scots. Last Summer I was all the way from extreme Northern Maine to Mexico, and numberless places between. But I am going to stay at home now.

It is kind of you — and just like you — to remember me with a book. I have that particular book by Maeterlinck's (of which I am very fond); but it does not matter, for I mean to exchange it here for "The Double Garden" by the same author, and your card will go in it just the same. Ever so much obliged.

Best regards to Mrs. Deane and all the babies you meet.

Yours for keeps

F. H. Bailey

Spring Rivulet

When the March suns come
And meadows are free
And the waters start
A-way to the sea,
Far back in the fields
When the keen winds blow
I follow a rill
From a bank of snow.
There the last drift lies
In a fence-row hedge
And an inch-wide rill
Drops out of its edge;
And the day-old pools
Ice-rimmed on the grass
Seep into the stream
As its waters pass.
Sparkle and sparkle the streamlets roam,
Grasses and twigs are pointing from home.

Oh winter, my winter, You have left me again;
The snow's gone from the hillsides and meadows are bare,
The orchards are vacant and all stark is the glen,
The highways are drying and the woodlands are spare

THE WINDSOR HOTEL.

W. S. WELDON, Manager.

Montreal, ... 190

Through the pastures high
Now free of their crows
On gray mailed dod
The rivulet grows; —
Dips under a root,
Falls over a stone,
Slips under a bank
With a muffled tone,
Shines out in the sun
Then sweeps round a knoll
And spreads clear and still
In a weed-edged bowl.
It drains the mud flews
In the fields of wheat —
And lays down the silt —
Where the currents meet.
Bubble and bubble tumbles the foam,
Grasses and twigs will find a new home.

Oh robin, my robin, You are with me again;
The sap's in the maple and the wood-twigs are bright,
The fence-rows are waking and afield are the men,
The March-winds are roaming and the willows are white.

W. S WELDON Manager

THE WINDSOR HOTEL.

Montreal, ... 19

It follows a groove
Turned out by the share,
Then digs to the rocks
And washes them bare;
Then into high swales
'Mongst the cat-tail reeds
Where the bushes dip
With burden of weeds;
And over a cliff
It splinters and falls
And dashes its spray
On the frost-work walls;
Then on to the flats
Where the frogs will peep,
Where the pebbles shine
And the bottoms deep.
In its bottoms deep.
Silent and silent-under the loam,
Grasses and twigs at last are at home.

Oh willow, my willow, You have come once again;
The sun's on the marshes and the brookside's green,
The lowlands are warming and aster is the fen,
The red-wing is calling and the marsh-pools are clean.

W. S. WELDON, Manager.

THE WINDSOR HOTEL.

Montreal, ... 19..

When the June days come
And the growths have spread,
I pick out the course
Of the dry stream bed;—
A pathway of stones
A dip in the land,
A basin of silt
A handful of sand;
A wisp of dry grass
Hung over the brim,
A log-jam of sticks
Where the stream was dim;—
Its life was as full
For a week or day
As rivers that roll
To the sea always.
Babble and babble next Spring it will roam,
Grasses and twigs will again sail home.

F. H. Bailey

CHATEAU FRONTENAC
QUEBEC

May 8, 1907

Dear Deane:

I am glad that you could read my rowsing verses. Sorry for Mrs. Deane's illness. I hope that the warm Spring weather (if it comes) may do her good.

The new Cyclo. is a very different affair from the other.

I have fussed more over it – but have not perspired so much. It is not all monographic, but a series of articles by good fellows embellished with pictures by the editor. I thought you would not care for a copy, as it has no botany or birds or Latin; but if you do, Lest you, you shall have it.

Lots of snow up here yet.

T. H. Bailey

Ithaca Improvement Society.

L. H. BAILEY, *President.* MISS CHARITY SMITH, *Secretary.* EDWIN GILLETTE, *Treasurer.*

Ithaca Oct. 9 [1907]

Dear Deane:

I am glad that you are impressed with the size of the new Cyclopedia.

I was glad to hear from you. Why can't you come out here in some of your trips? You would have a good time, and my house don't leak. I'd drive you over a beautiful country; and I would show you a college that would surprize you.

Dear me! I couldn't ~~speak~~ to a botanical club. I am as innocent of botany as a babe. I should much like to sit in your club and hear the good folks talk; but my speaking days are done.

I have been here all summer.

Regards to Mrs. D.

Yours

L. H. Bailey

L. H. B.

Country Life in America

EDITED BY L. H. BAILEY

Editor's Office, Ithaca, New York

May 26

Dear Deane:

A long absence in the South has seriously delayed all my correspondence. Amongst the other things is yours of Apr. 25; which came when I was somewhere in Georgia or Alabama, where Mrs. Bailey was staring her eyes out at the darkies. The little plant is,

I suppose, Ranunculus
Ficaria.

Glad that you
like "Nature Portraits"
Coming to see me
this summer? Better
come, both of you.

Thine L. H. Bailey

L. H. BAILEY, EDITOR.
WILHELM MILLER, ASSISTANT.

CYCLOPEDIA OF AMERICAN HORTICULTURE.

TO BE PUBLISHED IN 1900 IN ~~THREE~~ 4 ILLUSTRATED VOLUMES.

ITHACA, N. Y., 190

Dear Deane: Here is a puzzle. This Senecio is supposed to be S. Cineraria (Cineraria maritima), but that species is described as having globular-corymbose clusters, and this has racemose-paniculate inflorescence. Can't you see if it matches fairly well any specimens of Senecio Cineraria in herb. Gray? H. heads discoid + yellow.

L. H. B.

[The ill. looks more like Artemisia Stelleriana than anything else - S. Cinerarium has a globular corymbose inflorescence. W.D.]

Ithaca
Dec. 30

Dear Deane:

Happy New Year!

I am just home from the science meetings at Phila, where I saw Dr. Robinson & Dr. Farlow. I am glad of your letter and to hear of you again. Time flies by on relentless wing, and stays not for friendship. Every year I plan for less for the year to come, and every year brings more than the last one. I am sorry to hear of Mrs. D's illness; but you say she is better. Mrs. B. has been having a hard time with rheumatism. She was taken one day in August when we were all enjoying a carriage ride in the neighborhood of Mt. Blanc, and altho' she took treatment in several places in

Europe, she got no relief until we returned and I sent her to Mt. Clemens, Mich. She is now home (temporarily, I fear), but cannot yet dress herself. Otherwise we are all well and I am trying to earn enough money to provide a meal or two a day. I was twice in Boston ~~this~~ last month, but only went through. I wish you would both come to see us next summer. We expect to be at home, and we can catch fish enough to feed us.

The book you sent was one we wanted and did not have. Ever so good of you.

Thine, as of old,

L. H. Bailey

Nov. 24

Dear Deare:

It is true that "Country Life" is my journal, which for [illegible] accounts for all its shortcomings. It is also true that Walter Deane was one of the first subscribers and that his first year's subscription was paid long ago. I wish

that you and Mrs. D. might come here & see my new offices and my home. I know it would interest you. But I'll try to call on you and tell you about it - a week from to-morrow. I have many schemes up my sleeve. By the way, put your glass on the balcony of the very last cab-

on p. 15.

Cyclopedia goes along apace. Copy through the letter Z is now in the printer's hands, and the last fig. is no. 2800. Some have kept our promise to have "over 2000 illustrations."

Mrs. B. has been ill with a gathering in her ear, and had a slight surgical operation; but she is gaining now.

Nov. 29

Dear Deare:

Thanx. I have invited myself to lunch with you next Tuesday. That P.M. I go to Manchester, N.H. to speak; after which I shall be obliged to get out of New England as fast as I can be carried.

Thine

L. H. B.

of the sheriff. I am becoming very expert in dodging.

My little brood is all well. Sara, the elder girl, spent the summer at Chautauqua. She is now too big to spank & I have lost one of my favorite diversions. Remember us all to the wife.

Thine
L. H. Bailey

Bailiwick
ON CAYUGA LAKE,
(P. O. ITHACA, N. Y.)

Sept. 4

Dear Deane:

All summer I have been wandering in 20 states and territories. I have seen California from end to end and side to side, up and down the valleys and over the hills. I went as far north as Puget Sound. Through it all I maintained a perfectly sober con-

dition and thereby kept out of jail. I cannot vouch so strongly, however, for my sanity. And now I am here on my farm, enjoying wet feet and peaches. Of peaches I have a large crop, which I sell under trade mark at fancy prices. I had a big crop last year, too, and the trees are big with fruit-buds for next year.

I am building a barn on the place and planning enlargements of Bailiwick cottage; and this with rather extensive building in town keeps me occupied in keeping one jump ahead

May 10, 1909.

Dear Deane:

I like the Shakespeare book. One of my many small vices is a passionate fondness for poetry, and I have some good shelves of it. I have never cared for Shakespeare overmuch; preferring movements that are more free, unaffected and natural, and not so theatrical. Your book will help me to get more out of it. Ever so much obliged.

[Re: a wedding] today
Oct 28 [09]

Where the rain is wet.
Oct. 9, 1909

Dear Dears:

I must drop you a note to say that the Bailey family has decided into its units. Mrs B. is somewhere on the Pacific Coast. The elder daughter teaches in Los Angeles. The younger daughter is in College in New England. I am with the wind listeth.

When we shall all unite again nobody knows, but probably not for many months or a year. In the meantime I shall wander and be free; and when I return we

will gather up the broken
threads of our years of
correspondence. I will
send this letter back to
be posted and I hope
that you will get it in
due season.

I'd good by for many a
long free day and I
hope that good luck will
come to you at Mrs.
Deane. Fine ever

July 29, 1910

Dear Deane:

Dear me, You move about so much that I can hardly keep track of you. Getting back to my desk, I find letters from lots of folks, you among the rest; and I don't think I can ever answer them all — some of them dated last October.

I have your card about the accident. Not hurt badly, but bruised up and properly cross. Am doing my full work. Why don't You and the good Madame come here some time? The roof don't leak.

Thine forever

Christmas day,
1910

My dear Deane:

The book is exactly what I want, and I have already read part of it. Thank you for the remembrance.

It is good to hear from you again. We are all well and life goes along satisfactorily.

Our best regards to yourself and Mrs. Deane, and a happy holiday to you.

Yours truly
L. H. Bailey

The Chittenden
A FIRE PROOF HOTEL
Columbus, O.

NICHOLAS A. COURT
MANAGER

Feb. 7, 1911

My dear Deane:

Thanks for your letter. I don't know what to say about your kind invitation. I speak at the University of Maine on the 9th. I leave at mid night for Boston. Sometime on the 10th (I have not heard when) I am to speak for Mrs. Ware. In the evening I am the guest of the Rural Club, and they wanted to put me up at the University Club. I have

The Chittenden
A FIRE PROOF HOTEL
Columbus, O.

NICHOLAS A. COURT
MANAGER

had to refuse two or three other club & public invitations (one being the Twentieth Century Club). Long ago my old student - Rane (State Forester) asked me to come to him and bring Mrs. B, and I practically promised to do so. It is now very doubtful, however, whether Mrs B. comes, as she plans a little run out to St. Louis; and she will

naturally be going East in June when the daughter graduates from Smith. So, you see, I am like Tom Watson — I don't know where I am at.

I must see you, of course; but I shall be only one night (the 10th) in Boston. I am in Boston primarily to try to make a speech at 2 P.M. on Saturday before the Hort. Soc. Perhaps you and the madame can figure out for me a program. Friday night will lie between you and Rare.

Thine, perplexed,

R. N. Bailey

L. H. BAILEY.
ITHACA, N. Y.

March 4 [1911]

My dear Deane:

The Committees of the legislature are coming to inspect the College here next Friday, so that I shall not leave for Boston till that night, arriving about Saturday noon and returning Saturday night. So I cannot not call on any one, but I hope to see you at the Hall.

Thine

L. H. Bailey

L. H. BAILEY.

Jan. 17, 1913.

Mr. Walter Deane,

Brewster St.,

Cambridge, Mass.

My dear Deane:

In the article on "Botanic Garden" in volume 1 of the Cyclopedia, we want to show a picture of a botanic garden, preferably a view taken along a walk showing on one or both sides some of the beds and the labels. I want to show how the planting in a botanic garden is arranged and how it differes from the general ornamental border. I have not been able to get any photograph from which I could have a pen drawing made. It occurs to me that possibly you know of one taken in the botanic garden in Cambridge and could either have a copy made for me of the photograph or get the loan of the photograph until I could have a pen drawing made from it. I have written to the various botanic gardens in this country and strangely enough, I have not been able yet to get any picture that shows what a botanic garden is like. I have a number of my own showing the gardens at Kew but I want to show an American garden. If you know of anything of this kind, I shall greatly appreciate the favor of a photograph and of course I shall bear all expense.

Sincerely yours,

L H Bailey

Mr. Milton Dreno,
[illegible] St.,
Zanbil[illegible], [illegible].

My dear Dreno:

Do you want to help me a minute on the derivation of a generic name? The name I have in mind is Apiocarpus, one of the Deutzieae which is now coming back as a good generic name. I do not find the origin of this name anywhere in the books. I suppose that it might be taken from apium-carpellum, though I do not at all see the significance in it for a name. Unfortunately, I do not have access to the Bulletin of the Brussells Academy for 1854 when the name was made and perhaps the name is not there explained. Possibly you can give me a suggestion as to the derivation.

Sincerely yours,

L H Bailey

My dear [illegible]:

I am wondering if I can get you to help me on one of the Hypericums. Hypericum [illegible] of Aschborn has come into cultivation but I am unable to find description of it, inasmuch as we do not have the publication in which it was originally described. It is relatively a new species. It comes from Israel. You will find a reference to it on page 87 of the First Supplement of Index Kewensis. I am enclosing an old page of material on Hypericum and you will see that at the bottom of the first column, I have left those lines open for description of Hoelle's species. I am wondering whether I could ask you to look up the description and give me enough to fill that space.

Sincerely yours,

Christmas, 1913

POET

Tell me, O Poet, where thou dost live
Show me the place whereon thou dost stand
Lead me to the crests that give
Those wondrous scenes thou dost command
And let my waiting soul enwreathe
The rarer airs that thou dost breathe
Upon thy diamond shore.

He took me by the hand
And led me to my own hearthstone
We paused upon the wonted floor
And silent stood alone---
Till all the space was over-pent
With a magic wonderment;
And I found the Poet's store
On the threshold of my door.

Mr. Walter Deane,
Shelbourne, N. H.

My dear Deane:

I do not want to bother you when you are taking your ease in hot weather; but one of my European correspondents is very anxious to get specimens of the native Platanus occidentalis. Unfortunately I cannot find any of the trees around here that are bearing this year although usually they bear full. I have taken specimens of foliage for him but I ought to have some showing the seed-balls. If there should happen to be any Platanus occidentalis within arm's length of where you are, I should appreciate it very much if you could put some between newspapers and sit on them until they are dry and let me have them later on.

Yours sincerely,

L. H. Bailey

BUFFALO, N.Y.

[illegible] to see you. I believe I
[illegible] forward to meeting you
both.

I, too, am collecting in
these latter days and am
building up my modest-
herbarium. It is a great sat-
isfaction. If in surprising
how one misses the com-
monest things. Never to my
[illegible] to find Typha latifolia,
and, behold, I did it not!
But I shall find some [illegible]
ones there the next time I
look.

Ad for the Holidays, I

FIREPROOF

Hotel Iroquois

H. M. GERRANS, PRESIDENT
E. C. GREEN, MANAGER

BUFFALO, N.Y.

I have never seen much of it together, not enough to say for collecting roots for corn more. Sometimes around an old hay-packed yard one sees it in profusion but the space is not great and the life the Wild would, I should think very small. I should think it would be the easiest thing to grow, if the price were sufficient to pay.

Are you in the Pierce County? My Pentarium is now [illegible] poor in some native species, now [illegible]

they have been so critically
incarcerated.

Come to see you
sometime this winter.

Yours, with deepest
Sympathy,

F. H. Bradley.

L. H. BAILEY.

POPULUS MATERIAL WANTED

The planted poplars are so little understood that I am making an effort to assemble herbarium material from all parts of the country. I want pressed specimens of catkins and mature leaves from any and all poplars planted along streets, in yards, parks and nurseries. The name under which the tree is popularly known should be entered on the label, also the current botanical name if you know it.

If there are such trees within access, will you not aid me to secure specimens? The trees from which catkins are taken should be marked, so that foliage may later be had from the same tree. If catkins and foliage are taken from different trees, in any case, the fact should be noted on the label. Both sexes should be secured, when they exist. Any notes on the label as to size and habit of tree, character of bark, etc., will be very useful.

Any photographs to show shape and habit of tree will also help me in working up the material.

An item of cost of the material may come with the specimens and will be promptly paid.

Of course I also want any herbarium material of the native wild poplars.

L. H. BAILEY.

Ithaca, N. Y.

I am sending this to 200 botanists in the U.S. and Canada.

My dear Deane:

It is always a joy to hear from You; and this time it is a special satisfaction because it brings your excellent photograph. So it is 70 years! Congratulations on the distinction. My younger daughter, who has heard so much of you but has not seen you within her memory, said on seeing the picture, "Why, I thought he was an old man!" She was surprised.

We are all well, but very busy with the extra work of these unusual times.

Certainly we must put forth every effort to bring this vast dispute to a victorious end. The Germans must be licked, or there is no living in the world with self respect.

Your herbarium is really a great accomplishment. I am now mounting in my 24th thousand.

Regards of all of us, and best wishes for health and rest.

Thine ever

My dear Deane:

Glad of your letter. How your herbarium grows! Mine trails along with something over 29000 sheets mounted and in place. I have not boiled my specimens, in mounting, strictly on state lines.

My people are still talking about an autotrip into New England this summer, visiting the White Mts. and back through the Adirondacks. Can one go on Mt. Washington by auto? Of course the plan may not materialize.

Shortia galacifolia is now in bloom in my garden.

Ever yours,

L. H. B.

What a good winter we had!

Hotel Gillett

BOONE & POLAND, Prop's
Manhattan, Kansas

June 5 1919

My dear Deane:

I presume you are now at Shelburne enjoying the oncoming of the season. The season means much to me this year as I am trying diligently to fill the many gaps in my herbarium, now well over 30,000. The Churchill things are mounted and in place except two bundles. I trust you did not send others, else they may have been lost as I have rec'd none. Will be glad of them in the fall, if there are more.

We shall not take the auto. trip. The young woman goes for the season to the summer school at Cold Spring Harbor (Long Island). I have rec'd permission for passport and shall go over if I can get transportation within its value.

I hope you are well. We be.

Always Yours,

F. W. Bailey

My dear Deane:

Arriving home I found all your plants nicely mounted and waiting for me. They are now all distributed in the cases. They are a good lot, and I thank you for them. The Churchill plants are all in the cases complete. I have about 4000 specimens to mount this winter, and more to come.

My summer at Kew was in all ways delightful and profitable. I also met a good number of botanists in Scotland, Denmark and Norway.

My winter is unusually full of projects, and I fear I shall not get to Cambridge for a considerable time; but our last winter is a pleasant memory.

We are all well. Sara is here from China with her baby and husband.

Glad you are well.

Sincerely yours,

T. A. Bailey

Mr. Walter Deane,

29 Brewster St.,

Cambridge, Mass.

My dear Deane:

I am glad to find your letter of December 28th awaiting me. I shall look foward to receiving the bundle of Missouri plants of which you speak. I find a number of bundles of specimens waiting for me here and have a letter to the effect that more than 1000 specimens are on the way from Denmark. Gradually my little collection is growing.

I much enjoyed the book you sent me for Christmas. It is a subject in which I am specially interested.

I trust that you are well and I know that you are busy.

Sincerely yours,

L. H. Bailey

My dear Deane:

Glad I am to have your card of the 15th, but sorry for the rheumatism and the cane. I trust that spring & the birds and the telescope will bring you around again.

We are busy mounting the 5000 things or so ahead of us. More are coming and being arranged for all the time. This week I have received many hundreds from Copenhagen, and more are coming as also from Christiania. My cases are all full, and I am now getting bids for new ones to hold 30,000 sheets. Soon the spring will be here. I plan this year to fill up the gaps in most of the common things. Till last year I had no Trifolium repens from this country!

Good luck, L.H.B.

Judge J. R. Churchill,

Percival St.,

Dorchester, Mass./

Dear Judge Churchill:

From our good friend Walter Deane I have received the bundle of interesting plants comprising duplicates of your collections in Missouri, more than 100 things. These are a very welcome addition to my little collection, and I much appreciate your disposition of them to me. I trust they will be in safe keeping here and that they will be of use to more than one person.

All the others that you gave me last winter are long ago mounted and in place in my herbarium. Often they are of use to me when looking up the different species.

I trust that you are well. The winter is a hard one here but so far we have come through it in good shape.

Sincerely yours,

L. H. Bailey

Thanks. Will begin to mount today or tomorrow.

HERBARIUM OF L. H. BAILEY
ETHEL ZOE BAILEY, CURATOR

Ithaca, N. Y.
March 10, 1920.

Mr. Walter Deane,
Brewster St.,
Cambridge, Mass.

My dear Deane:

Your batch of Missouri plants is all mounted and the last of them go into the herbarium this morning. These are not only a welcome addition, but it has been a relief to lay them out. I have been working over a Danish collection, many of which are mounted on old small sheets. For the last two or three days I have been demounting Potamogetons, trying to cut off the old straps and still to save the specimens. You know what a task this is. When I got tired of this work I turned to your plants for rest.

I am putting in many interesting things this winter from many parts of the world.

We still have sleighing and are in the depths of winter, but we are all well and happy. I hope your rheumatism has now left you.

Faithfully yours,

L. H. Bailey

Aug. 20

My Dear Deane:

Your note is very welcome. I shall be here for nearly or quite a week yet. I have a lot of fuzzles, but Brassica particularly. I hope to make the next issue of Gent. Herb. a Brassica-Sinapis paper. By the way, I want more specimens of Brassica campestris and B. juncea. If they grow by you, perhaps you can put some in press.

Dr Robinson came in this morning; expects to return tomorrow. Fernald is in Nova Scotia. Dr Payson is here, but leaves for Wyoming in a day or so. It is very quiet here now, but the conditions for work are extra good. There is lots of daylight, and I get over here about 7 A.M.

Yours all the time

L. H. Bailey

L. H. BAILEY,
ITHACA, N. Y.

Autumn equinox
1921

My dear Deane:

Welcome home! I passed your corner, and it looked lonely without you.

The sheets go readily into my herbarium, and the work is a great joy to me. I am now about passing 50,000. As I have not divided States in the different regions and as I often mount several collections on a sheet, the number of labels much exceeds that figure. I have several thousand to mount this winter. My travels bring me many unusual things.

Today I begin Selaginella for

My Manual. I had my specimens of the ~~Cultivated~~ things — about 100 — at the Grays.

We are all well here. Wife and daughter often ask about You.

Always thine,

L. H. Bailey

ITHACA, N. Y.

Apr 20, 1922

My dear Deane:

I am glad to find two letters from you, written last month. I have had a fruitful collecting trip from Bermuda to Demerara; and now comes the problem of identifying all my material. I also find lots of accumulated material to mount that has come in during my absence, — from Sweden, Norway, Russia and elsewhere. The little collection grows in spite of me. I had my piece submerged while away.

I note your inquiry about the Nurserymen's Official List. Much good work has been put on it. The Committee is not interested in botanical nomenclature as such, but in unifying and standardizing the names in the trade; and in commercial work the authorities for the names are only a detriment.

Perilla ocimoides var. nankinensis, Vos, Vilmorin's Blumengärtnerei, 846 (1896).

Yours ever

L. H. Bailey

rec'd Apr 28/22

L. H. BAILEY.
ITHACA, N. Y.

Apr. 27 1922

My dear Deane:

Yours of the 25th is here. Good! The palm trees are coconuts. The trunks are never straight. It can not be the wind that drives them seaward in the photograph. I suppose it is the search for light, but there may be some other element involved. In this case I presume the constant undercwash of the sea has tipped the trees seaward to some extent: in fact, this may account for most of it.

For the synonymy of the Perilla, see Britton & Brown, Ill. Flora, 2nd Ed., III, 154. I do not

know just what horticultural form Bentham had in mind in his var. crispa. It may have been either a crisped (crested), bullate or laciniate form.

Congratulations on your anniversary! Yes, let the little book be my memento.

Yours ever

F.V.B.

June 2, 1922

My dear Deane:

I am not collecting much in this vicinity now, but will keep my eye open for grasses. I am taking the matter up with Dr. Wiegand, who can help you more than I.

Glad to have your note. Sorry to hear of Dr. Goodale's condition. If you see him, pray give him my best regards.

I hope you will have a good summer. I wish you would come this way for a visit. I should like to show you my little establishment and also our interesting country. The family joins me in this.

Sincerely yours,

L. H. Bailey

ans Aug 8

July 6, 1922.

Mr. Walter Deane,

Shelburne, N. H.

My dear Deane:

I have received the big bundle of plants and I am again under obligations to you. They are all very useful and will be in my herbarium before the month is out.

I am now busily at work on my manual of cultivated plants. Just now my stunt is the Amaryllidaceae and it is a troublesome one.

I hope you are having a good summer.

Yours as ever,

L. H. Bailey

Copy

Judge J. R. Churchill,
535 Kimball Bl@g.,
18 Tremont St.,
Boston, Mass.

Dear Judge Churchill:

I have received from Walter Deane another interesting and valuable bundle of plants. I shall begin mounting on these next week and they will soon be in my herberium.

I wish to thank you for letting me have all these good specimens. They come from ranges that otherwise I have had little opportunity to reach.

Sincerely yours,

S.N.B.

Mounting on May 57th Thousand, and lots ahead.

ITHACA, N. Y.

Ithaca, Oct. 14, 1922

My dear Deane:

Miss Anderson said she thought you were in the building as I left but she did not find you. As I had to make a train I could not wait. Very sorry to have missed you.

It is good to have seen you again and to have been in your home again. The years go on, and still we keep young.

I am now labelling and mounting the plants I identified on this trip to the Bronx and the Gray. There is a good lot of them.

The parcel you gave me a week ago tonight is here with my other things. And this morning your package came; I have gone over every one of the specimens in it, and they are a fine lot and very acceptable. Thanks. I feel that I ought not to be receiving these things from you and have nothing to send in return; but they

are all interesting all valuable to me. They will all be mounted next week.

Mrs. B. and the daughter inquired about you when I came home, and I was glad to be able to give them such good report.

Yours ever
L. H. Bailey

Shall be glad to have the Conifers.

Dec. 25, 1922

My dear Deane:

Schmucker's "Meaning of Evolution" is new to me and therefore very welcome, particularly as coming from you. Thanks.

We are hard at work on the new Manual and have considerably more than 100 of the 170 families completed. The little herbarium grows slowly also; we have about 2000 - 2500 specimens just now ahead of us to mount, from the Carolinas, S. Texas, Utah, California and some of my growing here. Good luck to You!

Yours ever
L. H. Bailey

Apr. 21, 1924

My dear Deane:

Four numbers of Gentes Herbarum have been published:

Fasc. 1. 1. Plantae Chinenses
" 2. 2. Brassicae Cultorum
3. Duo Hibisci Chinenses
" 3. 4. Cultigentes Variae, etc.
" 4. 5. Quidam Rubi Cultorum.

If you lack any of these, let me know and I will supply you. You are regularly on the mailing-list.

The Manual of Cultivated Plants was sent you, and you acknowledged it in one of your letters to Rio. One was sent to the Gray at the same time, I am sure.

Good for you! I want those Rubi. On p. 143 of my Rubus paper you will find remarks about the kind of specimens needed. I am glad to hear about the

forthcoming Flora of Coös Co. It is an interesting region.

Yes, we have our hands full. Just now I am working on the Venezuela Collections made more than three years ago. It is good to get them identified and in the herbarium.

All wish to be remembered.

Yours of old,

L. H. Bailey

L. H. BAILEY

Apr. 24, 1924

My dear Deane:

Thank you for letting me see the charming letter from Mrs. W. W. Bailey. How well I remember the calls I made on them in Cushing Street, so many long years ago! The account of Veltheimia is most interesting and should be published in one of the horticultural or botanical journals; and as the plant is apparently yet in bloom, a photograph should be made. It is a liliaceous Cape plant, seldom seen in cultivation. I wish I could have some herbarium material of it, if nothing more than a leaf and two or three flowers.

The spring begins to show, and the fields are calling.

Yours ever
L. H. Bailey

Dr. J. N. Rose,

Smithsonian Institution,

Washington, D. C.

My dear Rose:

I have your interesting letter of September 29th about the Cassias. You mention inclosing the photographs but they were not in the letter. As soon as the photographs and specimens are received, I shall be glad to send them to Dr. Britton as you suggest.

Mrs. Bailey's case is still serious, although she is now able to sit up practically all day and to walk a little with a cane about her room. Of course all our plans are at a standstill. I had hoped to be able to go back to Venezuela this autumn to clean up the job there but this is out of the question. If she continues to improve for the next month or two, the doctor feels that she ought to be taken away from here for the winter, but of course we cannot take her out of the country.

Sincerely yours,

L. H. Bailey

Thine ever

L. H. B.

L. H. BAILEY,
ITHACA, N. Y.

Nov. 26, 1894

My dear Deane:

The plant you sent me from N. H. as Rubus recurvans (as 37, 38, 39, 40, 41, 42, 45) is a form of R. flagellaris. It differs from the usual forms in the marked pubescence on the under-surface of the leaves and in the frequent 5-leaflets, but these variations occur now and then. It is difficult to break up R. flagellaris and have any consistency or continuity in the results; even Blanchard did not attempt it.

I am giving all my spare time to Rubus these days, but shall not publish further till spring or summer.

I hope you are well enough to consume a turkey tomorrow.

Coconut Grove, Fla.
Mch. 19, 1925

My dear Deane:

We have just returned from Palm Beach where we drove (about 80 miles) and Mrs. B. stood the journey bravely. Ethel and myself went on a collecting trip to Lake Okeechobee, driving 164 miles one day, photographing, and filling our presses. We got a lot of interesting things, among others what appears to be a new Rubus. We also found a wild Cucurbita, which has been picked up before (in fr.) but not yet

made out or described.

I much appreciate the birthday greetings from my dear old friend of the early and the latter years, and the women of the household return your kind remembrances. Mrs. B. continues to improve slowly.

Now you are watching the Early Robins, and we listen to the Mockingbird and the Cardinal; and at dusk and dawn we hear Chuck-wills-widow.

Ever thine

Apr. 16

My dear Deane:

Just in and find "Messer Marco Polo". It is a book I was expecting to buy, and here it is to my hand and from my dear old friend in the bargain! I appreciate the book and the remembrance.

I had a good trip northward, much of it thro' Florida in an auto. My collections of the winter are 1002 numbers, more than 50 of them Rubi. The brambles are now in fruit on their Southern limits, just going out of bloom in the Tallahassee region, in full blossom about

Savannah; and here the trees are yet bare and snow is in the air.

Glad to find your card waiting for me. There is a world of work on my table.

Yours till the End,

L. H. Bailey

L. H. BAILEY
ITHACA, N. Y.

May 8, 1920

My dear Deane:

"In a swamp at Sudbury" is where Bigelow got Rubus setosus more than a hundred years ago, and to this day no one seems to have collected this same plant again. I suppose there is no swamp at Sudbury any more and probably his collecting ground there is unknown. Do you know the region there?

The two girls got home on the 5th, and while the good wife was tired she really stood the journey well. I took 1002 numbers in my collecting this winter, and in palms and rubus a good lot of material in every case (so far as possible). I am now just beginning to get the material organized.

It is good to get back, for the sake of getting to work if nothing else. It is pleasant to see a real spring, with the marked change in climate and vegetation.

Ever thine

L. H. B.

ITHACA, N. Y.

Sept. 24 1925

My dear Deane:

In preparing Fasc. V of Cent. Herb. I wish to state the span of life of Dr. Brainerd. I have written twice to Burlington to get the date of his death but without result so far. So last night I wired you, thinking you might know; and I shall be under additional obligation.

The autumn days are here again, and my garden is near its end. It has been a good garden this year, yielding me not only vegetables but 100–200 species of interesting things for camera and herbarium. And now it is going into Dianthus, more than 100 kinds (species and races) for next year's bloom.

I trust you come back refreshed by the mountains and the woods.

Really yours,

L. H. B.

P.S. Telegram just here. Good work!

L. H. BAILEY,
ITHACA, N. Y.

Oct. 5, 1925

Dear Deane:

The Geranium (which I return) is the same thing you sent me before, and I thought it might be G. Phaeum, L. The flowers ought to tell, and they should be obtained next year.

I have 121 sheets of Geranium from the Old World, it matches Phaeum best; but the genus is difficult & I can't be sure.

Always glad to have dried bunzzles from you.

L. H. B.

Sent Herb. rec'd; thanx

rec'd Oct 27

Oct. 25, 1925

My dear Deane:

It is an unusually good and complete lot of Rubus you send me, and I am under peculiar obligation to you for them. I appreciate the great pains you have taken to make such good specimens and to keep the records so straight. I hope to have them mounted next week.

Specimens in Rubus and Vitis have come in rapidly this year; of the former we have now mounted some 600 sheets since April, and there must be more of Vitis although I am still "shy" on New England material.

I shall always think of you when working over N. E. Rubus.

Yours faithfully,

L. H. Bailey

My dear Deane:

That Prunus from Lincoln, Mass. has been before me on my desk, as I have come and gone from several absences out of the state and elsewhere. I am not sure of it. The fruit is very late for any cherry or plum I know, — and the stone is a cherry and likewise the fruit has no suture and is cherry-stemmed. It may be a form of P. Cerasus. I hope you will have opportunity to see more of it next year.

I have not yet had specimens of the little Acacia-like thing you found on Brattle St.

Thanks for verifying the Brainerd data for me. It helped me in a time of need.

Thine ever

L. H. Bailey

Snow!

L. H. BAILEY
ITHACA, N.Y.

Dec. 16, 1925

My dear Deane:

Not merely because Christmas approaches but because I would like you to read the book (if you do not have it) I am sending you a volume by mail. Do not feel at all under obligation thereby to send anything to me; a letter will be sufficient, and I trust it will say that you are well and busy. In October I sent you my last Rubus paper, but I hope it has not broken our friendship.

Mrs. B. remains about the same, and the young woman is busy in our little Shop (which I wish you would come to see).

Yours always,

L. H. Bailey

Feb. 11, 1926

My dear Deane:

It is pleasant to have your note of the 8th and to know you are well and busy. I appreciate your congratulations. The presidencies were not of my seeking or desire, but I shall do the best I can with them. You should come to Ithaca next August to attend the International Botanical Congress.

We are busily at work in the shop, and there seems to be no stop to the mounting. We are now above 80,000 sheets and still at it. Mrs. B. holds her own well.

'Tis a good typical winter but not extreme. I have much enjoyed it.

Thine ever

L. H. Bailey

A. A. A. S. PHILADELPHIA MEETING EDITION

Science News-Letter

The Weekly Summary of Current Science

A Science Service Publication

Edited by Watson Davis
Vol. X No. 298*

10¢ a copy $5 a year
December 25, 1926

A. A. A. S. MEETING

Registration and Railway Certificate Validation

As its contribution to the success of the Philadelphia meeting, Science Service is presenting gratis to each person attending this special edition of its SCIENCE NEWS-LETTER. The following official statement by Dr. Burton E. Livingston, permanent secretary of the American Association for the Advancement of Science, tells you just what to do in order to register, how to get the official program and how to arrange for making valid your railway certificate entitling you to reduced railway fare on your return trip.

Registration is accomplished by handing in at the registration desk a registration card, properly filled out, and paying the registration fee of one dollar. Each person who registers receives the badge for the meeting, a copy of the general program, etc., and may secure the validation of a railway certificate. Paid-up members of the American Association, associates for this meeting and foreign associates for this meeting may register without paying the registration fee, as follows:

Life members of the Association and annual members who have paid their dues for 1927 should have their registration cards officially stamped at the Records desk before presenting them at the Registration desk.

Old members who pay their dues at this meeting should make their payments at the Membership-Dues desk, having their registration cards officially stamped here before presenting these at the Registration desk.

New members who join the Associaton at this meeting should each present a membership-application card and a registration card (both properly filled out) at the Membership-Dues desk, paying the entrance fee ($5) and the first annual dues ($5) and having their registration cards officially stamped there before presenting these at the Registration desk. Payment of entrance fee may be omitted by any paid-up member of an affiliated organization, including the affiliated state academies.

Associates for this meeting should each present a membership-application card (writing "Associate" at the top) and a registration card (both cards properly filled out) at the Membership-Dues desk, paying the associate fee ($5) and having their registration cards officially stamped there before presenting these at the Registration desk.

Foreign associates, who are invited guests for this meeting, are exempt from payment of both associate fee and registration fee. Each of these is asked to write "Foreign Associate" at the top of the registration card and to present the card (properly filled out) at the Registration desk, showing the official invitation previously received from the permanent secretary's office.

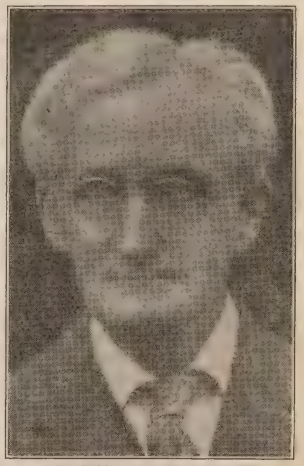
Official representatives or delegates from institutions of learning and other scientific organizations are to mark their registration cards to this effect, stating the names of the organizations represented.

Endorsement and validation of railway certificates should be cared for immediately after registration. Leave certificate at Validation desk (not later than December 31), being sure

(*Just turn the page*)

MICHAEL IDVORSKY PUPIN

Prof. Pupin is retiring president of the American Association for the Advancement of Science; his address will be given at Drexel Hall, Monday night at 8:15. Dr. Pupin holds the position of Professor of Electro-Mechanics at Columbia University



LIBERTY HYDE BAILEY

Dr. Bailey is president of the American Association for the Advancement of Science, and will officiate at the general sessions. He has for many years been this country's leading author, editor and publisher on horticulture and related subjects, as well as a keen systematic botanist.

More A. A. A. S. News, Page 199

How to Register

(*Continued from Page* 193)

that your identification card (which you received on registering and which you keep) is there marked to show that a certificate has been deposited. The certificate will subsequently be validated by the representative of the railway companies. Call for it later at the Validation desk, presenting your identification card. Unvalidated certificates will not be honored by the railway ticket agents, for the purchase of return tickets at half-fare rates.

Return railway tickets from Philadelphia are to be purchased (not later than January 5) by presenting validated certificates at the proper railway office, at least 30 minutes before the scheduled time of departure of the train for which each certificate is to be used.

BURTON E. LIVINGSTON,
Permanent Secretary.

Science News-Letter, December 25, 1926.

A. A. A. S. MEETING

Publicity Arrangements

The publicity work of the American Association for this meeting is under the direction of Austin H. Clark. His offices will be found close to those of SCIENCE SERVICE in Weightman Hall, the same building in which registration headquarters and the exhibition are located. Prof. Reese James of the University of Pennsylvania is chairman of the local committee on publicity to this meeting and he, as well as SCIENCE SERVICE, is cooperating with Mr. Clark. Those who have not yet turned in papers are urged to hand in one copy to Mr. Clark and another copy to SCIENCE SERVICE, as requested in the blue sheets.

Science News-Letter, December 25, 1926

A gallon of water to a goldfish is a good recipe for a fish tank.

Funds are being raised to preserve Henry Clay's home in Lexington, Ky., as a museum.

A motor plow that can be worked within six inches of vegetable rows or fences has been invented.

Recent tests of the mentality of a young gorilla revealed that the animal was decidedly right-handed, like most humans.

About 45,000 Greek athletic fans could be packed into the stadium in which the famous Olympic games were held.

News-Letter Features

Born over four years ago of the demand and interest of those individuals who had caught a glimpse of *Science Service's* news reports to newspapers, the SCIENCE NEWS-LETTER has since proved interesting to laymen, scientists, students, teachers and children.

Into the pages of the NEWS-LETTER are fed the cream of *Science Service's* output directed at the newspapers of the world. To this is added material especially prepared.

Turn the pages and note:

It is a *separable* magazine. You can clip or tear out any article without losing or damaging another article on the other side.

Each article is automatically *indexed* by the key word printed above its heading. Articles can thus be filed easily into any system of classification.

Each article is automatically *dated* by its last line.

The current *news* of science, reported for Science Service by its own staff and correspondents throughout the world is presented and commented upon in each issue.

Books are *reviewed in brief* as they are received from the publishers.

The classics of science and striking passages from current books, addresses and periodicals are carefully selected and published.

Important *anniversaries* of science are appropriately noted week by week in a special department.

Regular articles tell of the happenings in the *skies* and in the great *outdoors*.

Photographs aid in the telling of the week's science.

Great care is taken to keep its editorial content not only *interesting* but *accurate* as to fact and implication.

The Science News-Letter is copyrighted and is sold with the understanding that it is for personal, school, club or library use only. Publication of any portion is strictly prohibited.

SCIENCE NEWS-LETTER, The Weekly Summary of Current Science. Published by Science Service, Inc., the Institution for the Popularization of Science organized under the auspices of the National Academy of Sciences, the National Research Council and the American Association for the Advancement of Science.

Publication Office, 1918 Harford Ave., Baltimore, Md. Editorial and Executive Office, 21st and B Sts., N. W., Washington, D. C. Address all communications to Washington, D. C.

Entered as second class matter October 1, 1926, at the postoffice at Baltimore, Md., under the act of March 3, 1879. Established in mimeograph form March 13, 1922.

Subscription rate—$5.00 a year postpaid. 10 cents a copy. Ten or more copies to same address, 6 cents a copy. Special reduced subscription rates are available to members of the American Association for the Advancement of Science.

Advertising rates furnished on application.

Copyright, 1926, by Science Service, Inc. Republication of any portion of the SCIENCE NEWS-LETTER is strictly prohibited since it is distributed for personal, school, club or library use only. Newspapers, magazines and other publications are invited to avail themselves of the numerous syndicate services issued by Science Service, details and samples of which will be gladly sent on request.

LINCOLN MEMORIAL FROM ACROSS THE POTOMAC, WASHINGTON, D. C.

84064

The Lincoln Memorial, modeled after a classic Greek Temple, is situated on an eminence in P[ot]omac Park on the banks of the Potomac River.

From the far side of Tidal Basin the Memorial as pictured here, mirrored in the placid blue Potomac, is very beautiful and attractive, especially in the early spring when the Japanese cherry trees are in bloom. These trees were a gift of the municipality of Tokyo to the United States Government when Mr. Yukio Ozaki was mayor of that city.

Jan. 10, 1927

My dear Deane:

It is good to see your handwriting again. I seem to be all over the country, but we live in La Jolla, and that address will reach us for two months yet; our actual hat-rack is 7756 Eads Ave.

We have a car (sent across in advance by freight) and we move about rapidly, even Mrs. B.

riding as much as 125 miles a day. She holds her own, but unfortunately does not seem to gain. I am doing a lot of collecting, and am after the 60-80 palms grown on the coast. We have been once down in Mexico and expect to go again soon to see Agave Shawii in bloom. A good number of showy Aloes (of course introduced) are now in prime condition.

Thine always,

L. N. B.

L. H. BAILEY

7756 Eads Ave
La Jolla
Jan. 29, 1927

My dear Deane:

Here you are on our mantle, as life-like as you please, where all of us can see; and it is good to have the likeness. We thank you.

All goes well with us. I am busy with my collecting, particularly with the palms, all of which I photograph, mostly both tree and leaf. I have some 75 species to get here, and they are bulky, heavy things. Only one, of course, is native (Washingtonia) and that I am to explore in the mountain canyons leading out into the Colorado Desert, — on the Eastern side the mountains in California and the Western side in Arizona. It is fascinating work.

Mrs. B. remains about the same. The daughter enjoys it all.

Ever thine

L. H. Bailey

L. H. BAILEY
ITHACA, N.Y.

May 6, 1927

My dear Deane:

The young woman and myself arrived yesterday in good shape, 4,512 miles from Santa Barbara in a little open car. We had a thoroughly good time.

I find your card of Mch. 22, and am sorry to hear of the break in your family. You have been fortunate to have had the family hold together so long. My only brother went some years ago, and I had no sisters.

You will find Yuma in extreme S. W. Arizona near the head of the Gulf of California; and El Centro is westward in Imperial Co., Calif, about a dozen miles N. of the international boundary.

I hope you are well and busy.

Ever yours

L. H. Bailey

L. H. BAILEY
ITHACA, N.Y.

May 15, 1927

My dear Deane:

Thy letter of the 9th is welcome, as your letters always are. It is good to know of your many escapades, and particularly of the long long ride to So. Hadley. You should get started again in that direction and not stop until you reach Ithaca, N.Y.

Mrs. B. arrived yesterday, having come alone from Battle Creek, Mich. She is recovering something of her old courage.

I am interested in the ingenious advertizing toy. Note that under the shield on p. 3 there is a magnetized bar; and the pointer on the front follows it.

All send best regards.

LANSING, MICHIGAN

Aug. 4, 1927

Dear Walter Deane:

I was glad of your note of July 23. With us in N. York, also, the midsummer is wet but here it is very dry and things are suffering. It is strange what different conditions exist in places not so very far apart, as distances go in this great country.

The older daughter is the one who was in China. She is now academic secretary in the Chicago Latin School for Boys and is doing very well; and the younger daughter is my constant aid. Sara's

little boy, now 5, is in Ithaca in a good family under our eye. We could not take him in the house with us; it would not be fair to Mrs. B. (who is always glad to hear from you). The daughter, now 9, is with the mother. They are delightful children.

It is a comfort to me to know that you keep so well.

Yours ever,

L. H. Bailey
